

2016

Planet Highlights

In 2016, we continued the journey we started in 2015 to track and reduce the carbon emissions generated by our Victoria, BC, headquarters.

In 2016,
28.3%
of staff
commuted by
low-emissions
transportation.

Our overall reduction of annual
greenhouse gas emissions was **15.16%**

We won!

Carmanah received the
Technology Excellence Award at
the Vancouver Island Eco Star
Awards.

ECOSTAR Awards
2016

We installed new recycling bins this
year, helping us divert 99% of waste
from the landfill.

Things we're working on

Our commuting-
related
emissions per
year are equal
to the emissions
from

14

cars on the road
in one year, a
number we hope
to decrease in
2017.

Our shipping emissions increased by 7.6
tCO₂e, much a result of increased air
shipments. We are looking into ways to
reduce these emissions.

We took 108 fewer
flights in 2016,
helping us decrease
emissions from
business travel by
33%.

FYI: We now track carbon
emissions as part of our
internal quarterly key
performance indicators
reporting.
